BUY PRIVATE ACCESS

Prices from $500 I work only with RU speaking users

CLOSE YOUR SECURITY BLIND SPOT WITH DARK WEB INTELLIGENCE.

Expand your cyber threat intelligence capabilities with Cerberus, the world's most powerful dark web search and investigation platform. Gain visibility into illicit forums, marketplaces, and encrypted channels where threat actors coordinate - before they target your business.

" *Before we used Searchlight, conducting an investigation on the dark web was a complicated process that involved the use of an isolated computer off the network.*

UNCOVER HIDDEN THREATS IN COVERT FORUMS AND CHATS

Access curated and searchable dark web intelligence through a secure and user-friendly platform, enabling proactive threat detection, credential leak monitoring, and early warning on emerging threats.

SUPPORT BUSINESS-CRITICAL INVESTIGATIONS

Accelerate investigations from due diligence in acquisitions to executive threat response. Cerberus's powerful search tools help CTI teams quickly identify and report on relevant threats to their business.

SEARCH LIVE AND HISTORIC DARK WEB DATA

Our dataset is automatically updated and archived, meaning data remains within Cerberus even if it was deleted at the source. CTI teams can search across years of historic data to uncover long-term threat actor and ransomware patterns.

PART OF SEARCHLIGHT'S ALL-IN-ONE EXTERNAL CYBER RISK MANAGEMENT SOLUTION

ASSETNOTE

Attack Surface Management

- Hourly scans across your entire environment
- Alerts on verified exposures, with POC's for every finding
- Zero-day alerts from our research team in product

DARKIQ

Dark Web Monitoring

- Continuous dark web scanning
- Get prioritized alerts focused on your specific attack surface
- Resolve threats quicker with out MITRE ATT&CK® mapping

CERBERUS

Dark Web Investigations

- Identiy, preserve, and share dark web evidence with ease
- Securely access Tor and I2P services with our virtual machine
- Set alerts to monitor keywords and actors across the dark web

Criminals using the dark web think you can't see them. *With Cerberus, you can.*

USE THE SAME PRODUCTS AND DATASET TRUSTED BY LAW ENFORCEMENT ORGANIZATIONS AROUND THE WORLD TO ACCESS +475 BILLION RECAPTURED DATA POINTS AND IDENTIFY THREATS EARLIER.

KEY FEATURES

Ransomware Group & Market Dashboards

Access continuously updated intel on 100s of active ransomware actors, groups, and markets. Track their latest tactics, targets, and victims, so you know who's most likely to strike your business.

Cerberus AI Insights

Automatically turn dense, unstructured dark web discussions into actionable insights - summarizing conversations, categorizing threats, and analyzing sentiment.

Leaked Credential Search

Perform point-in-time searches for previously hard-to-obtain stolen credential data to enhance intelligence requests, incident response, and investigations related to breach and infostealer data.

Stealth Browser, Dark Web Virtual Machine

Anonymously investigate I2P and Tor directly from the browser, safe in the knowledge that your identity is protected and malware can't jump to your live network.

Make Searching on the Dark Web Easier

Simplify intelligence gathering by setting up automated alerts for keywords, Boolean queries, threat actors, and activity relevant to your organization.

AI-Powered Translation

Understand what criminals are saying using our AI-Powered Translation, optimized for dark web content.
