

## PROACTIVE DARK WEB MONITORING FOR ADVANCED THREAT DEFENCE

Defend your clients against deep and dark web threats and grow your business as an MSSP partner. With DarkIQ, you can automatically identifies threats to the clients' brand, supply chain, and employees, with actionable dark web alerts – before they become costly incidents.

*The addition of the pre-attack intelligence provided by Searchlight Cyber complements the growth of the more conventional protection market, such as SOC and EDR.*

## DIFFERENTIATE YOUR OFFERING AND GROW YOUR BUSINESS

Our flexible MSSP pricing makes it easy for partners to add dark web intelligence to their managed SOC services and enhance one-off pen-tests, security audits, and incident response services.

## UNCOVER HIDDEN THREATS AND UPSELL OTHER SERVICES

Use our advanced engine as a basis for service wraps. DarkIQ automatically indexes, translates, and enriches dark web data – filtering out the noise so you can act on the earliest signs of an attack.

## DETECT PRE-ATTACK SIGNALS NO OTHER VENDOR CAN SEE

Gain visibility into Tor traffic to and from your clients' network, enabling the detection of insider threat, data exfiltration attempts, and potential malware command-and-control activity.

## PART OF SEARCHLIGHT'S ALL-IN-ONE EXTERNAL CYBER RISK MANAGEMENT SOLUTION

### ASSETNOTE

# Stop cyber attacks before they happen

WITH THE HELP OF DARK WEB INTELLIGENCE, OUR PARTNERS ARE ABLE TO DETECT EXTERNAL THREATS BEFORE THEY HAPPEN. THIS SHIFT FROM REACTIVE TO PROACTIVE INTELLIGENCE ALLOWS THEM TO SHOWCASE THEIR ROI BY IDENTIFYING CYBERCRIMINALS IN THE RECONNAISSANCE STAGE AND PREVENTING ATTACKS.

## KEY FEATURES

### Multi-Tenant Monitoring

Easily create and manage multiple customer profiles from a single dashboard. Monitor the brand mentions across underground forums, marketplaces, and encrypted Telegram and Discord chats.

### Dark Web Traffic Monitoring

Advanced network traffic analysis provides visibility into all incoming and outgoing dark web traffic to any client's IP address, CIDR, or domain using our proprietary agentless technology.

### Modeled by the Way You Do Business

Whether you offer year-round managed support or one-off engagements, our flexible pricing allows you to add DarkIQ licenses as needed, while protecting your margins.

### AI-Powered Translation

Understand what criminals are saying using our AI-Powered Translation, optimized for dark web content.

### Integrated MITRE ATT&CK® mapping

Rapidly respond to threats with context-rich alerts mapped to the relevant MITRE ATT&CK® techniques and their recommended mitigations.

### Company Health Dashboard & Reporting

Create one-click reports on the latest threats and ransomware groups, with the option to add your own branding.

## TRUSTED BY LEADING MSSPS AND COMPANIES WORLDWIDE
